AIRPLANES

NOTE: This Catalog replaces T. O. No. 01-65B-4 dated September 15, 1942.

NOTICE: This document contains information affecting the National Defense of the United States within the meaning of the Espionage Act, 50 U. S. C., 31 and 32, as amended. Its transmission or the revelation of its contents, in any manner to an unauthorized person is prohibited by law.

RESTRICTED

AN 01-65BC-4

Published under joint authority of the Commanding General, Army Air Forces, the Chief of the Bureau of Aeronautics, and the Air Council of the United Kingdom.

THIS PUBLICATION MAY BE USED BY PERSONNEL RENDERING SERVICE TO THE UNITED STATES OR ITS ALLIES

Paragraph 5.d. of Army Regulation 380-5 relative to the handling of "restricted" printed matter is quoted below.

"d. Dissemination of restricted matter.—The information contained in restricted documents and the essential characteristics of restricted material may be given to any person known to be in the service of the United States and to persons of undoubted loyalty and discretion who are cooperating

in Government work, but will not be communicated to the public or to the press except by authorized military public relations agencies."

This permits the issue of "restricted" publications to civilian contract and other accredited schools engaged in training personnel for Government work, to civilian concerns contracting for overhaul and repair of aircraft or aircraft accessories, and to similar commercial organizations.

LIST OF REVISED PAGES ISSUED

NOTE: A heavy black vertical line, to the left of the text on revised pages, indicates the extent of the revision. This line is omitted where more than 50 percent of the page is revised.

This issue contains no revisions.

ADDITIONAL COPIES of this publication may be secured on Requisition, AAF Form 102, as prescribed in AAF Regulations 15-102. Submit requisitions to: Commanding General, Air Service Command, Patterson Field, Fairfield, Ohio. Also, see T.O. No. 00-25-3 for details on distribution of Technical Orders. (Requests from Naval activities shall be submitted to: Chief of the Bureau of Aeronautics, Navy Department, Washington, D. C.)

INTRODUCTION

SECTION I

AN 01-6500-4
RESTRICTED

SECTION I - INTRODUCTION

This is the Parts Catalog for the RP-47B, RP-47C, and P-47D Airplanes. It is divided into five sections:

Section I - Introduction

Section II - Group Assembly Parts Lists

Section III - Numerical Parts List

Section IV - Standard Parts List

Section V - Service Tools

Section II is a break-down of the parts of the airplane. The parts which make up each assembly are listed in their proper break-down order. Each major installation appears as a column 1 item; its sub-assemblies and sub-subassemblies and detailed parts are in columns 2, 3, 4, 5, 6, etc.

The columns titled "Figure No." and "Index No." are interpreted as follows: The first number (in column titled "Figure No.") refers to the illustration or figure number on which the part is shown. The second column (Index No.) indicates the number of the item in the figure.

Insofar as possible, the illustrations indicate sub-assemblies as follows: Index numbers suffixed by a letter indicate that the suffixed index number is a sub-assembly of the plain number. For example, index numbers 24A, 24B, 24C or 2A, 2B, 2C of an illustration indicate that those parts are sub-assemblies of index numbers 24 and 2 respectively.

In some cases the sub-assemblies have been indicated as shown below.

In this case the index number (or numbers) appearing within the border of the circle indicates that it is an assembly of the parts indexed on the border; in the illustration, parts indexed 12, 13, 14, 15, 16, are sub-assemblies of parts indexed 11, 17, 18, 19, 20.

One of these two methods has been followed wherever possible. In some instances, rigid adherence to this policy would have confused the break-down. In such instances, the sub-assemblies have been numbered consecutively and the break-down may be determined from the written copy only.

Section III lists all parts in numerical order. The quantity per airplane is indicated and the assembly list pages on which those part numbers appear are also given. The numerical sequence used in this section is as follows:

1. Part numbers that are prefixed by a letter are listed in alphabetical order preceding all others.
2. Following these, the part numbers are arranged in numerical order with the first factor of the part number determining its position. The first factor consists of those numbers which precede either the letter or the first dash in a part number. For example, the following part numbers are listed in proper sequence with the determining factors underlined.

1-1001-506-C-10

2-10

89F11000

3. A secondary numerical break-down of those part numbers having the same determining factor is made in accordance with the numbers following either the first dash or letter in the group. For example:

89F11000

89F11009

89F21010

Section IV lists all Contractor, AN and AC standard parts in numerical order. This list also includes the number per assembly and the attaching quantity.

Section V lists and illustrates the special service tools.

RESTRICTED
AN 01-65BC-4
SECTION I - INTRODUCTION

Section I
Introduction

This handbook may be used as follows:

If you know the part number and wish to find its illustration

Find in Section III, the "Numerical Parts List", the part number and the assembly page number on which it appears.

Turn to the page number indicated and find the part number in Section II, "Group Assembly Parts List."

Read the figure number and index number for that part and then turn to the proper figure and find the desired index number on the illustration.

If you do not know the part number, thumb through the illustrations. This will be found convenient, since all illustration pages are left hand pages.

When the part is located in the illustration, determine the index number and figure number. Then find the desired information in the "Group Assembly Parts List" which follows each illustration.

Note

Care must be exercised to assure that the part number is applicable to the particular block of airplanes in which you are interested. If no block designation appears after the part name in the "Group Assembly Parts List", that part may be used on all models. The block designation of the airplane is stenciled on left side of the fuselage above the wing fillet.

In order to assist the user, the drawing numbering system of the Contractor is explained below:

Typical Part Number 89022136
Location _____
Group _____

Location of the part is designated as follows:

- "F" - Part located in fuselage
- "C" - Part located in center panel
- "P" - Part located in power plant

Group Designations are as follows:

- 10 - Airplane general assembly
- 11 - Fuselage assembly
- 21 - Wing assembly complete
- 22 - Panel assembly center
- 24 - Wing tip assembly
- 25 - Flap assembly
- 26 - Aileron assembly
- 27 - Wing fillets and fairing

Section I
Introduction

RESTRICTED
AN 01-65BC-4
SECTION I - INTRODUCTION

- 31 - Installation of surface controls
- 32 - Installation of aileron controls
- 33 - Installation of elevator control
- 34 - Installation of stick control
- 35 - Installation of trim control
- 36 - Installation of rudder control
- 37 - Installation of hydraulic system
- 38 - Installation of brake control
- 39 - Installation landing gear chassis
- 42 - Installation tail wheel
- 43 - Installation landing gear fairing
- 51 - Installation empennage
- 52 - Stabilizer assembly
- 53 - Elevator assembly
- 54 - Rudder assembly
- 55 - Fin assembly
- 56 - Installation empennage fillets
- 61 - Installation power plant
- 62 - Installation engine and engine mount
- 63 - Installation engine cowl
- 64 - Installation engine controls
- 65 - Installation fuel system
- 66 - Installation oil system
- 67 - Installation exhaust system
- 68 - Installation supercharger and induction system
- 71 - Installation armament
- 73 - Installation fixed guns
- 76 - Installation pyrotechnics
- 77 - Installation camera
- 81 - Installation instruments
- 82 - Installation electrical system
- 83 - Installation radio system
- 84 - Installation equipment and furnishings
- 96 - forgings, castings

Standard Parts are prefixed by the letter "S".

The block system of designation is used to show variations of airplanes within the model. The "RA" and the "RE" suffix is used. Any reference to "RE" applies directly to an "RA" airplane bearing the same block designation numeral. To date, the following are the block designations of the various models:

P-47B	P-47D	*P-47D-4-RA
P-47C-RE	P-47D-RE	P-47D-5-RE
P-47C-1-RE	P-47D-1-RE	P-47D-6-RE
P-47C-2-RE	P-47D-2-RE	P-47D-10-RE
P-47C-5-RE	*P-47D-3-RA	

* These model designations were created since this catalog was prepared for publication.

P-47D-3-RA identical to P-47D-2-RE except for the incorporation of certain P-47D-10-RE changes as follows: Water Injection System Installation, Circuit Protector in General Circuit, Elevation of Guns, Test Switch for Oxygen Warning Light, Installation Microphone Adapter M-299, Spring Detent on Rear Gun Mount, Installation of AN-104-A Antenna, Enlarged Cooling Gap between Shroud and Oil Cooler Duct Shield, Elevation of Ring and Bead Sight and Guns Relocation of Fuel Lines, Elimination of Propane Priming System, Revised Main Switch Box, Relocation of Oxygen Regulator, Fuel Lines from Fuel Pump to Carburetor relocated.

P-47D-4-RA identical to P-47D-3-RA except for incorporation of additional -10 changes as follows: Redesigned Main and Auxiliary Fuel Tanks, Provision for Incendiary Grenades, Installation G-9 Booster Pump, Installation Bomb Shackle for External Tanks, Revised Mounting for Defroster Tube, Quick Demountable Dynamotor Base, Elimination of 200 gals Belly Tank Provisions, Frameless Gun Sight, Elimination of Provisions for SCR-635A Radio, Accumulator Air Loading Extension, Redesigned Level Lugs.
